

BalanceBox® 400H
for interactive whiteboards
and projectors

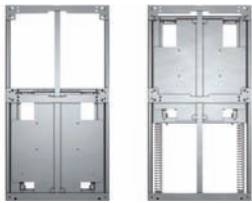

Thomas Regout International B.V. offers a broad range of linear motion solutions that help move your application in any direction: horizontal, vertical and diagonal.

Challenge us, in any way. Based on its 180 years' experience in linear motion solutions, Thomas Regout International B.V. offers a range of high quality products for use with large touchscreen displays and interactive whiteboard systems. In our challenge to offer you a comfortable and intuitive solution to adjust your screen vertically, we have developed the BalanceBox[®], a user-friendly, ergonomic, high-quality, reliable and sustainable product that allows you to move your screen up and down, and even tilt, in a manual way.

BalanceBox[®] 400H

The BalanceBox[®] 400H is the most reliable and stable product on the market for high-low (400 mm / 15,75 inch) adjustment for interactive whiteboards and projectors. The BalanceBox[®] 400H has a weight capacity up to 90 kilo's (198 lbs) total in a compact and stylish stainless steel design that is hidden behind the whiteboard. The universal interface frame can be used for any brand of whiteboard up to 120 inch diagonal. For all SMART Board[®] whiteboards and projectors a specific SMART Board[®] interface is available. Both a floor support for safe mounting on non-supporting walls and a mobile stand are part of the product range.

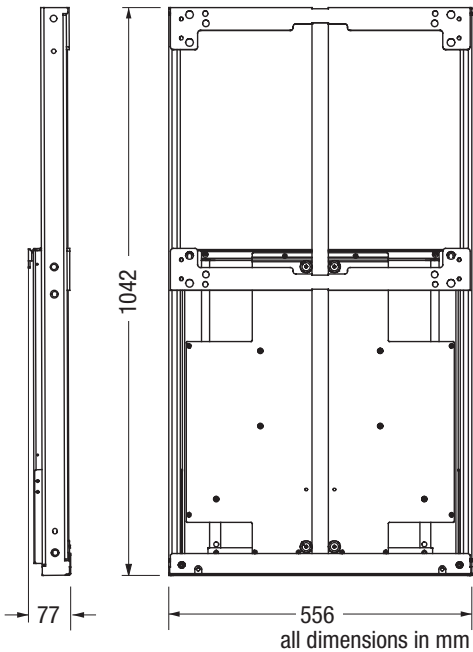

features and benefits

- 1 Ergonomics: smooth, effortless
- 2 Compact design: hidden behind the screen
- 3 Intuitive high-low adjustment
- 4 Extremely reliable; tested to 60.000 cycles (10 years of usage)
- 5 Fast and easy mounting
- 6 Complete range of accessories
- 7 Low transportation costs
- 8 No maintenance needed
