SMART™

SMART Podium™ 500 series interactive pen display

Create engaging presentations and dynamic collaboration sessions with the SMART Podium 500 series interactive pen display. You can interact with and write over digital content on SMART Podium, all whilst displaying that content on a large screen in the same room or from a remote location.

Flexible and versatile

The versatile 500 series display works as a powerful presentation tool and supports collaboration in virtually any learning space, from small classrooms or labs to large auditoriums. Open presentations, documents, applications, websites and multimedia files, write notes over them in digital ink and save your work for distribution or later reference. In rooms equipped with SMART Board™ interactive whiteboards or displays, you can work with content from anywhere in the room and display it on the interactive whiteboard or display. And in distance education scenarios, teachers and students can share screens using SMART Bridgit™ conferencing software and mark up documents and files as if they were in the same room.

Deliver powerful presentations

With the SMART Podium interactive pen display, you can create and deliver engaging, interactive, digital presentations. Because your course material is in front of you and displayed on a large screen, you can focus on keeping students engaged. The display's tethered pen acts as a mouse to navigate content on your screen – control computer applications and write notes in multiple digital ink colours over applications, slides, websites and videos. The Smooth Tilt Stand helps support a natural writing posture, whilst intuitive function buttons – illuminated for dimly lit rooms – enable you to change ink colours, erase, highlight and emphasise content, access the mouse function, and save and share your work.

The 500 series offers

- Your choice of a 47 cm (18.5") or 61 cm (24") widescreen display
- Native 16:9 aspect ratio with flexible scaling options to support 16:10 and 4:3 resolutions
- Revision 1.3 HDCP compliance
- DVI, HDMI or VGA connections
- Four high-speed USB 2.0 ports
- The ability to write notes in digital ink and save everything to a single file
- The ability to write within Microsoft® Office applications and save notes in the original files

1 USB 2.0 ports – high-speed connections for peripherals such as USB drives, document cameras or personal mobile devices

2 Application tool buttons – launch SMART software, capture screenshots

3 Pen tool buttons – launch the On-Screen Keyboard, pointer or right-click function and select the eraser or pen colours

4 Support tool buttons – launch help and orientate the screen

5 Magnetic pen tray – rest the tethered pen here for easy access

Key features

DViT™ (Digital Vision Touch) technology

SMART Podium features SMART's own DViT technology. By incorporating cameras in the bezel to detect pen touch and movement, DViT provides a responsive, accurate writing experience.

Widescreen high-definition (HD) interactive display

View your content in sharp detail with a 47 cm (18.5") or 61 cm (24") progressive-scan LCD display. The 47 cm display features 720p resolution. The 61cm display features 1080p (full HD) resolution.

Elegant design

The 500 series features a slim profile, a minimised bezel with a magnetic pen tray and a reduced overall footprint, complementing virtually any learning space.

Console buttons

Access the right-click button, select pen colours or the eraser, or launch the On-Screen Keyboard, Screen Capture tool or SMART Notebook™ collaborative learning software. The buttons are illuminated for use in dimly lit rooms. They are also preconfigured but can be programmed to suit the shortcuts you use most.

Tethered pen

Control your computer from SMART Podium and comfortably write over any application with the battery-free tethered pen. Because the pen is the point of contact on the interactive screen, you can rest your hand on the screen whilst writing notes.

SMART Ink

SMART Ink smooths out your handwriting to improve legibility. You can write notes over any application and save them into several common applications, including Microsoft Office 2010 programs or Adobe® Acrobat® Pro. You can also turn handwritten notes into text objects that you can manipulate.

Smooth Tilt Stand

Smoothly and easily adjust the position of your SMART Podium, so you can comfortably rest your hand on the display whilst you make notes and maintain eye contact with the people around the table or in the audience.

HDCP compliant

Ensure the smooth, secure transfer of digitally copyrighted materials between your computer and SMART Podium.

High-speed USB 2.0 ports

Access three high-speed USB 2.0 ports to connect peripherals like a USB drive, document camera or personal mobile device. A fourth USB 2.0 on the rear connection panel is provided to connect a computer.

SMART Notebook software included

SMART Notebook software sets the standard for creating, delivering and managing interactive lessons within a single application. With all your instructional materials at your fingertips, you can save any notes or content that you write during a presentation to share with students later. A powerful and easy-to-use application, SMART Notebook software enables you to readily deliver interactive presentations that will keep your students engaged and interested.

SMART GoWire™ auto-launch cable included

The cable enables guest laptops without SMART software to connect to the display.

Warranty

Receive a two-year limited warranty on your SMART Podium. Extend your warranty to five years by purchasing an extended warranty from an authorised reseller.

Technical specifications
Operating systems

The 500 series supports Microsoft Windows® and Mac OS operating systems.

SMART Podium	Size	Size with adjustable stand	Display area	Weight (with stand)
