

SMART Table® 442i collaborative learning centre

SMART
Inspired Collaboration™

The SMART Table is a social, inclusive and captivating collaboration tool that makes it easy to get young students excited about learning. It's a great way to enhance the social and academic skills of active learners and ensure that all students can achieve success.

Active small-group collaboration

Up to eight students can learn together at the same time, interacting with activities on the multitouch surface.

Engaging, interactive content

Access ready-made content for early years education from the SMART Exchange™ website. You can also create new activities using the SMART Table Toolkit or import SMART Notebook files.

Designed for the active classroom

The sturdy pedestal restricts tipping by even the most enthusiastic learners. The SMART Table can support 90kg (200lb) on its scratch- and spill-resistant surface.

Accessible for all

The horizontal, 360 degree surface makes it easy for all students to participate, including students using wheelchairs or those with limited motor skills.

Key Features

Simultaneous multitouch capability

SMART Table supports up to 40 simultaneous touches, enabling eight students to collaborate on lessons at the same time. It also supports simple, intuitive gestures like rotate, toss and zoom.

Extensive content and resources

SMART Table comes with over 1,500 ready-made activity packs. You can download them free of charge from the SMART Exchange™ website, which can be accessed directly from SMART Table. The SMART Table Toolkit makes it easy to create and enhance SMART Table activities. You can also import SMART Notebook lessons, so that you can use the same lessons that you create for your SMART Board™ interactive whiteboard on your SMART Table.

High-quality display

SMART Table features a 106cm (42") LCD, 1080p display that is virtually free of shadows and glare. The images are sharp, the colours are vibrant and students can work in almost any lighting conditions.

Rugged design and easy set up

The sturdy pedestal prevents tipping by even the most enthusiastic learners. The SMART Table can also support 90kg (200lb) on its scratch- and spill-resistant surface. Set up is easy – the SMART Table can go from the box to being in use in 30 minutes.

UDL friendly

SMART Table was designed with Universal Design for Learning (UDL) in mind, giving you the flexibility to provide multiple ways for students to interact with lesson content and express their knowledge. You can also develop and personalise interactive content to accommodate students with additional learning needs.

Mobile design

SMART Table is designed to fit through standard doorways, so it's easily moved from classroom to classroom, allowing one school to share interactive learning centres between multiple rooms. Optional castors are available.

Bring objects to life

Connect a SMART Document Camera™ to SMART Table to capture and display images and video. If you have a SMART Notebook file with 3D content in your activity pack, you can use the SMART Document Camera with a Mixed Reality Cube to manipulate the content.

Free training and support

A wide variety of training and support options are available to help you get going quickly and start experiencing the full benefits of your SMART Table.

Share SMART Table content with the whole class

The SMART Table comes with a free licence for SMART Sync™ classroom management software, which enables you to share SMART Table content with the whole class via the SMART Board® interactive whiteboard. You can also send activities from your own computer to SMART Table.

Virtual user group

Join our online user group, where members help each other to get the most out of their SMART Table. Monthly live events connect you with product experts who share best practices and show you how to create lesson activities.

Built-in Wi-Fi

SMART Table features built-in Wi-Fi, allowing you to connect to the SMART Exchange website directly, as well as to your network from anywhere in the school.

Warranty

SMART Table comes with a limited equipment two-year warranty.
